

Transmission & Substation Maintenance Optimization Assessment

In today's competitive market, utilities are constantly looking for ways to reduce their overall maintenance costs and outage rates. opX's Maintenance Optimization Assessment program offers a proven approach to upgrade your utility's transmission and substation maintenance program. This state-of-the-art program provides a platform to integrate your utility's present maintenance practices with the most advanced Best Practices currently available.

opX personnel evaluate both the programmatic and technical aspects of your utility's current Transmission and Substation Maintenance program before any recommendation is made. All facets of your utility's program are reviewed, including: management and work culture; personnel skills and qualifications; human performance factors; and, current technologies, before any new procedures are recommended to be integrated into the current system.

Benefits

- Streamlined Maintenance Practices
- Reduced Overall Maintenance Costs
- Reduced Outage Rates
- Integrated State-of-the-Art Technologies
