

## Asset Management Program

Every piece of equipment in a utility's power generation and distribution system is a valuable asset. It therefore makes sense that an Asset Management Program should be put in place that protects the equipment and extends its useful life. opX offers such an Asset Management Program that provides a good comprehensive, integrated, and proven approach for managing your Generation and T&D assets to meet corporate productivity, reliability, and profitability goals.

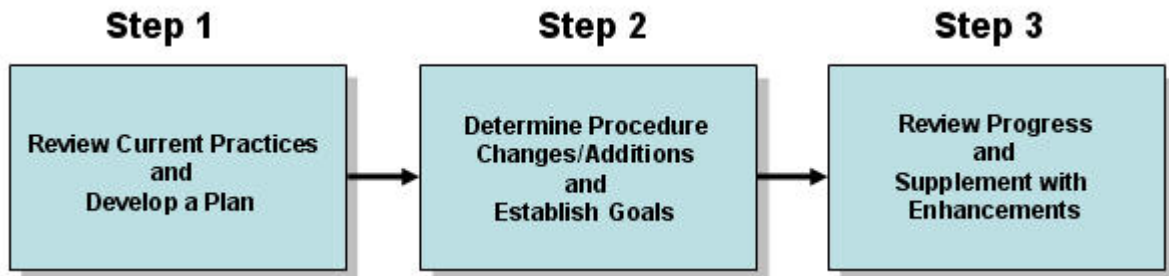

Our Asset Management Program goes well beyond normal equipment maintenance. To realize its total benefits, the Program also includes operational performance, engineering and design (including strategic goal development), risk management, maintenance processes, system operations, and engineering analysis and design.

### Benefits

- Increased Reliability and Availability
- Reduced O&M Cost
- Increased Revenue
- Increased ROI, ROA, & NPV
- Extended System Life
- Reduced Spares Inventory
- Improved Manpower Utilization
- Improved Productivity
- Reduced Equipment Repair and Replacement Costs
- Improved Environmental and Regulatory Compliance

**opX** can provide assistance in setting up such a comprehensive Asset Management Program in your utility. The Program would include management interface, technologies, personnel resources, skills and qualifications, work culture, operations coordination, equipment ownership, and all related aspects of improving asset management. This Program would consist of 3 primary Steps which will be done in concert with your utility goals.

Our Asset Management Program serves both the Nuclear and Fossil Generation Utilities and their Transmission and Distribution areas. The Program consists of: Performance Assessment ♦ Benchmarking-Strategic and Long Range Planning ♦ Asset, Project Resource Prioritization ♦ Asset Valuation ♦ Life Cycle and Risk Management ♦ Investment and Value Optimization ♦ Organizational Development ♦ Change Management ♦ Knowledge Capture and Management Support Issues.
