

Asset Management Optimization Assessment

Since deregulation, the utilities have been forced to focus on short-term cost reductions that have influenced their asset management strategy. Your utility, today, is now seeing major changes in the business environment and are, therefore, being forced into more complicated Asset Management decisions.

opX's Asset Management Optimization Assessment helps each Utility evaluate its current Asset Management program; therefore, the utilities are able to recognize the potential areas that could impact the reliability of their T&D systems.

opX personnel are experienced in the key factors of Implementation and Integration of procedures and technologies to create a successful Asset Management project. opX integrates your utility's current program to the latest strategies to meet the needs and goals of the corporation.

The final result will be a systematic, integrated, and custom program designed to meet your corporation's productivity, reliability, and profitability goals. The Assessment is composed of 3 Steps: 1) Evaluation of your current program; 2) Assist in developing a comprehensive and detailed Implementation Plan; and, 3) Support the continuation of increased level of performance in the program.

Benefits- Step 1

- Identify Areas for Improvement
- Define Specific Critical Issues
- Create a Prioritized List
- Develop a Framework

Steps 2 and 3 may be done separately once Step 1 has been completed. The utility may choose to complete Step 2 at a more convenient time, or may postpone the remaining Steps until budget constraints are completed.

Benefits- Step 2

- Detailed Review Asset Management Program
- Detailed Assessment of Processes
- Detailed Implementation Plan
- Increased Performance

Step 3 assists your utility in continuing the progress that was established in Step 2. opX personnel will support the utility's leadership team with their review and reinforcement necessary to solidify the benefits of the program and to create a platform of excellence.

Benefits- Step 3

- Increased Revenue
- Increased Availability
- Reduced Operation and Maintenance Costs
- Increased ROI and NPV
