op X Consulting Works with Progress Energy to Develop Enhanced Job Plans

Since the fall of 2009 op X Consulting has been providing service to Progress Energy's T&D Asset Management organization in the area of Job Plan Development

The Primary objective of the Job Plan Preparation Project is to work with Progress Energy personnel and revise or create enhanced Maintenance Job Plans for Circuit Breakers on their Transmission system.

These Job Plans are being developed from materials provided by Progress Energy and include such items as:

- Manufacturer Instruction Manuals
- Maintenance Basis Documents
- Previously Developed Job Plans
- Previously Developed Maintenance Procedures

The project continues to receive support throughout the organization as additional Job Plans are created.
