

Work Management - Planning and Scheduling

Since utilities must depend on having an effective maintenance program, **opX's** Work Management program provides your utility with an effective planning and scheduling plan that not only optimizes your current maintenance, but aids in avoiding equipment failures and system outages.

opX works with your utility's cognizant staff to review current practices and assemble a planning and scheduling guideline that incorporates the industry Best Practices, and a complete and realistic Implementation Plan.

opX experts provide training and coaching for: 1) a rolling workweek schedule methodology; 2) cross-functional team organization; 3) work order procedures; 4) a structure for prioritizing emergency work; 5) creating informational work packages; 6) implementing planning and scheduling performance goals and metrics; and, 7) providing on-the-job training and process support tools.

Benefits

- **Strong Planning and Scheduling Organization**
- **Improved Work Order Procedures**
- **Optimized Use of Cross-functional Teams**
- **Maximized Resource Utilization**
- **Minimized Impacts caused by Emergency Work**

Work Management Planning and Scheduling defines when the planned maintenance is to be done. Interwoven in the scheduling process is the planning of the work, the availability of the proper staffing, and materials that are necessary to ensure that the work is done most effectively and timely.
