

Process of Process Improvement (POPI)

Process Improvement is a series of actions taken by a Process Owner to identify, analyze and improve an existing process within an organization to meet new goals and objectives. These actions often follow a specific methodology or strategy to create successful results.

opX's Process of Process Improvement (POPI) Service Offering

enables its' clients with the tools and techniques to evaluate and improve its current processes. Your organization will utilize these Process Improvement Tools and Techniques to introduce process changes, improve quality, reduce costs, or accelerate schedules.

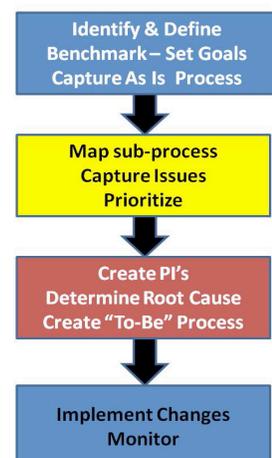

opX personnel's extensive experience in the many key facets of Implementing and Integrating a Process Improvement program will enhance your organization's ability to integrate your processes with the latest strategies to meet corporate goals and objectives.

The benefits of our services are to provide a systematic, integrated, and customized program which will continually meet your corporation's key goals and objectives. POPI is comprised of key 10 steps. POPI begins with identifying and defining the boundaries of the process to be improved/evaluated and culminates with an implementation plan and improvement metrics (KPI's).
